To Whom It May Concern:

RE: Letter of Support for Future Forward Community Schools — Beaumont, Texas

On behalf of **Best Pool Service**, I am pleased to support the establishment of **Future Forward Community Schools** in Beaumont, Texas, serving the Golden Triangle.

Beaumont-area children deserve innovative education that prepares them for academics, college, careers, leadership, and life. Future Forward Community Schools combine rigorous, accelerated learning with real-world experiences, career preparation, technology, and community engagement.

We are especially encouraged by the school's vision of making **the community an extension of the classroom**. Partnerships with businesses, nonprofits, higher education, government, and community organizations will give students project-based, real-world learning that builds academic, technical, leadership, and problem-solving skills.

Future Forward Community Schools aims to prepare middle school students for advanced high school opportunities, including Advanced Placement, dual credit, early college, and Career and Technical Education pathways. These options can lead to college credits, industry credentials, and potentially an associate degree during high school.

Our children's success is vital to Beaumont and the Golden Triangle. Preparing more physicians, engineers, educators, entrepreneurs, technology innovators, skilled-trades professionals, business leaders, and engaged citizens will strengthen our workforce, economy, and community for generations.

For these reasons, **Best Pool Service supports the charter application and establishment of Future Forward Community Schools in Beaumont**. This initiative can expand educational opportunities and strengthen connections among schools, families, businesses, and the community.

Best Pool Service is also interested in exploring partnerships with Future Forward Community Schools through CTE programs, mentoring, internships, career exploration, student projects, tutoring, work-based learning, guest speakers, facilities, technology, professional expertise, and financial or in-kind support, as appropriate.

We encourage approval of the charter application and look forward to its positive impact on students, families, and the Greater Beaumont community.

Together, we can prepare today's students to become tomorrow's leaders, innovators, professionals, entrepreneurs, and community builders.

Sincerely,

Kim P. Celestain Sr.
