

LET'S KEEP THE CONVERSATION GOING

Future Forward is being designed with Beaumont, not simply located here.

We want to learn from the organizations already helping families navigate transportation, food, housing, health, workforce, and other barriers that can affect a student's ability to thrive in school.

A SCHOOL CANNOT REMOVE EVERY BARRIER ALONE.

That is why community partnerships matter.

STAY CONNECTED

Proposed public charter middle school
Beaumont, Texas

Information reflects the current proposed school model and may evolve through the charter approval and planning process.

WHY THIS CONVERSATION MATTERS

Future Forward wants to be part of that Ecosystem, not duplicate it.

1

LISTEN

What are families telling you?

2

CONNECT

How can schools and services coordinate?

3

REMOVE BARRIERS

What keeps students from showing up ready to learn?

We are here first to listen, then to build partnerships where there is a meaningful fit.

A NEW KIND OF MIDDLE SCHOOL FOR BEAUMONT

**Strong academics • Personalized support
Real-world learning • Emerging technologies**

**KNOWN. SUPPORTED.
CHALLENGED. PREPARED.**

Meeting students where they are and helping them prepare for what comes next.

WHAT IS FUTURE FORWARD

A full middle school day with flexibility.

A full-day learning experience that meets Texas instructional requirements while maximizing time for learning, growth, and preparation.

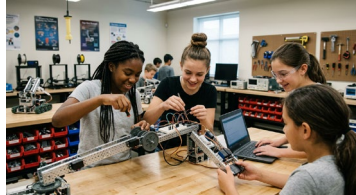

THE WEEK AT A GLANCE

- Monday through Friday: core academics, Learning Labs, authentic projects, and individualized support
- Thursday: leadership, communication skill building, wellness, clubs, and academic support
- Friday: career exploration, financial literacy, entrepreneurship and community-connected learning
- Readiness and advisory are built into every school day

HIGH EXPECTATIONS. BUILT-IN SUPPORTS.

EVERY STUDENT DESERVES A PATH FORWARD

Students should not have to choose between catching up academically and becoming ready for what comes next.

FOR STUDENTS WHO NEED SUPPORT

Targeted reading and math support, personalized goal setting, and real-time progress monitoring eliminate gaps without lowering expectations.

FOR STUDENTS READY FOR MORE

Acceleration, projects, emerging technologies, and community-connected learning keep students challenged and engaged.

Supporting Students and Families

When families face barriers outside school, we want trusted referral pathways and community partners. We are not a school trying to become every service itself.

TEKS-aligned academics • Embedded supports • Family partnerships • Safe, relationship-centered culture • Emerging technologies

WHAT TRUE PARTNERSHIP LOOKS LIKE

Future Forward is not asking one organization to solve everything. We are asking how a new school can connect more intentionally with the network already serving Southeast Texas families.

- ✓ Help families connect to trusted community resources
- ✓ Share what you are hearing about barriers facing students and families
- ✓ Introduce mentors, speakers, career partners, and community experts
- ✓ Help us think through transportation and access challenges
- ✓ Create referral pathways instead of duplicating existing services
- ✓ Continue the conversation as the school model develops

YOUR EXPERIENCE MATTERS.

The people who serve Beaumont families every day can help us design a school that works in real life.

Let's continue the conversation.
